PLAYRITE

Youth and junior players are the core of our game, and their numbers grow at an exponential rate. Teenagers and adults enjoy a seamless transition from intermediate to senior models (with various flex options and height increases). But what about the junior and youth markets? They don't have the same consistency. Flexes and stick height differences change too dramatically with each size.

The Playrite system is tailored to the unique needs of a child. The sizes and flex levels fit the players as they grow and enables them improve their shot. To help parents find the right product quickly, all Playrite sticks have a unique number plus a color coding system.

GS350 BOOKING PROGRAM

The Sher-Wood GS350 Limited Edition collection offers a total of 12 new color schemes in three distinctive series to help match any goalie's taste. Offered in LH/PP41 and 24", 25", 26" and 27" pattern height, the program features Sher-Wood's most popular model, the GS350. With four order and delivery dates throughout the year, this program allows you to place multiple smaller orders as opposed to a large booking order to turn your inventory quicker and better manage your cash-flow.
